DESERT WATER SUPPLY

Dear Desert WSC Customer,

The EPA is requiring all public water systems to gather data and submit an inventory of their water system's components. Specifically, the material of the water lines and fittings in the following locations: Main, Service line, Both Sides of the meters, and the type of plumbing inside the house. Most of this information the water either already has or will be gathering the field data in the weeks to come. However, the type of plumbing inside the house, we do not have access to. We would appreciate any information you may be able to provide. This inventory is part of the efforts to reduce the amount of lead in drinking water.

Please provide the information requested below. If you have any questions or concerns, please contact Andrew Moore @ 903-818-8412.

Service Address _____

Account # _____ Year Plumbing Installed _____ (IF known)

Type of Plumbing (Please check all that apply)

____ PVC, Plastic, or PEX

____ Copper

____ Galvanized, Iron

____ Unknown

Please Return this form to the Desert WSC office. We appreciate your cooperation in providing this information to meet the requirements of the EPA's request.

You may also email the form to consulting073@aol.com as we have hired Consulting 073 to assist us in gathering the data required.
